Education

Maharaja Agrasen Institute of Technology (MAIT) **2025 – 2028**
Bachelor of Technology, Computer Science & Engineering (Lateral Entry) — ***8.5 CGPA*** *Delhi, India*

DSEU GB Pant Okhla - III Campus **2022 – 2025**
Diploma in Mechanical Engineering — ***8.9 CGPA*** *Delhi, India*

Experience

Root2Rise — Full Stack Development Intern **October 2026 – Present**
Next.js, React.js, TypeScript, Tailwind CSS, Node.js *Remote*

- Built and integrated frontend features in a **Next.js, React, and TypeScript** application, including reusable components, roadmaps, and pricing pages; connected UI workflows with backend APIs.
- Collaborated through **Git feature branches and pull requests**, incorporating code-review feedback and resolving integration issues.
- Performed TypeScript checks (`tsc --noEmit`), functional testing, and debugging before submitting changes.

Navigate Skill — Full Stack Development Intern **June 2026 – July 2026**
React.js, Node.js, Express.js, MongoDB *Delhi, India*

- Developed full-stack application features using **React.js, Node.js, Express.js, and MongoDB**, implementing frontend components, REST APIs, and database integration.

Projects

Project Manager Dashboard | *React.js, TypeScript, Node.js, Express.js, PostgreSQL, Socket.IO, JWT* **Live** **GitHub**

- Built a full-stack project management platform using **React, TypeScript, Node.js/Express, and PostgreSQL**, supporting task workflows, filters, activity logs, and persistent notifications.
- Implemented **role-based access control** for Admin, Project Manager, and Developer roles using JWT authentication, HttpOnly refresh-token cookies, and API-level ownership checks.
- Developed real-time task updates, activity feeds, and online presence using **Socket.IO**; implemented scheduled overdue-task detection.
- Wrote **Jest unit tests** for authentication and role-based access control; deployed the frontend and backend and debugged production API connectivity and configuration issues.

URL Shortener | *React.js, Node.js, Express.js, MySQL, Redis, Docker, JWT* **Live** **GitHub**

- Built a full-stack URL shortener with custom aliases, link expiration, QR code generation, and click analytics.
- Structured the backend into routes, controllers, services, and repositories, exposing **REST APIs** for authentication, URL management, redirects, and analytics with request validation and centralized error handling.
- Implemented **Redis caching** on the redirect path with cache hit/miss handling and TTL-based expiration to reduce repeated MySQL lookups.
- Secured APIs using **JWT authentication**, **bcrypt** password hashing, and protected routes; wrote **Jest unit tests** and deployed the application, debugging production API and database connectivity issues.

Technical Skills

Languages: JavaScript, TypeScript, Java, C++
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js, REST APIs, JWT Authentication, Socket.IO
Databases & Caching: PostgreSQL, MySQL, MongoDB, Redis
Testing & Tools: Jest, Postman, Git, GitHub, Docker, Vercel
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems

Achievements

- Participated in **Bharatiya Antariksh Hackathon 2026**.
- Solved **300+ DSA problems** across LeetCode and GeeksforGeeks.
